

V4T – E-Learning Course
Module 3 - Programming applications for mobile devices

Practical Activity 2

Title: MAKER DAYS for kids

Description:

In an open (digital) workshop, children and teenagers aged 10 – 14 can work creatively and design and produce different products with different (digital) tools and materials.

Here some examples of offered stations – textile design with programmable embroidery and sewing machine; programming and physical computing; control robots; working with 3D printers and vinyl cutters; electronic crafting etc.
