

## Section 2

### Chapter 10 - Social Media And Education. Main Challenges, Strengths And Weaknesses Of Mobile Apps In Education

# Exemplary case 4

Title: **Instructables**

Description:

Instrutables was founded by the MIT Media Lab and shares their work and inspiration for free with other users all over the world. They tend to connect handcraft with internet technology. Everyone is invited to contribute to the site and further develop ideas which were already shared on the site.

In from time to time contests are run on the site where individual people, teachers or classes can enter and win prizes.

The site is full of interactive workshops and lessons how to craft things like 3D models or fundamental techniques to find out about sewing, digital graphics and many more.

By using the internet and getting knowledge virtual pupils earn knowledge they can use aside from the virtual world. The outcomes can be shared again on the site.
